# 1. Qualitative Information Regarding the Current Quarterly Financial Results

# (1) Explanation of Operating Results

During the first quarter of the current cumulative consolidated period, the Japanese economy was on a recovery track, with consumer spending picking up thanks to wage increases at companies and the effects of various government policies. However, the outlook remains uncertain, with the yen continuing to weaken, and geopolitical risks such as the prolonged Russia-Ukraine situation and the Israel-Palestine situation causing soaring raw material and energy prices, as well as price hikes that exceed wage increases.

In the food service industry, the economy is on a recovery track thanks to the expansion of inbound consumption and an upturn in consumer trends, but the business environment remains tough due to rising raw material and energy prices and continued cost increases caused by labor shortages. In addition, rising prices have led to consumers focusing on saving money and lifestyle changes have led to the creation of diverse values.

In this environment, guided by our company motto of "our customers' joy is our joy," we have been working on creating robust existing stores, investing in growth, and sustainability as the pillars of our management strategy, and as a result, during the first quarter of the current consolidated cumulative period, revenue was 17,826 million yen (up 1.5% year on year), operating profit was 102 million yen (down 24.7% year on year), ordinary profit was 144 million yen (down 20.9% year on year), and profit attributable to owners of parent was 152 million yen (up 40.5% year on year).

Next, we would like to report an overview of each business segment.

<Conveyor belt Sushi business>

# Our company management strategy

Amid a tough business environment characterized by continuing price hikes and an escalating diversification of values, our company aims to realize our company motto and to enhance revenue, contribute to the sustainable development of society, and improve our corporate value by focusing on three pillars of our management strategy: ① Creation of robust existing stores, ② Growth investment, and ③ Sustainability.

#### ① Creation of robust existing stores

We recognize that strengthening the profitability of existing stores is important for sustained improvement of its corporate value, and is therefore promoting the following initiatives.

#### 1) Increased frequency of visits

We have sought to improve customer loyalty by reviewing the specifications of some strategic products and selling "Premium Salad Gunkan," which reproduces the original taste of "Salad Gunkan," a very popular product in Nagano Prefecture, where the company was founded. We are also responding to diverse consumer needs by distributing complimentary cards for active seniors and expanding our lunch sets, which are available from 594 yen including tax at some stores. At our stores, we are working to improve the value of our customer experience by focusing on training sashimi-cutting masters and service masters who promote the improvement of sashimi-cutting and customer service skills.

## 2) New customer acquisition

We have been working on price appeal through fairs where we sell our most popular ingredient, "tuna," for 99 yen per piece including tax, and fairs where we sell high-quality ingredients such as "sea urchin" and "throat seaperch" for 110 yen including tax. We also held fairs called "Kappa's Hokkaido Festival" and "Kappa's Kyushu and Okinawa Festival," promoting the value of enjoying the feeling of traveling and enjoying local gourmet food, and have been disseminating information about this through TV commercials featuring celebrities.

In addition, we are selling products made in collaboration with Kakunoshin, the world's most "serious about meat" company, as well as cheese sweets created under the supervision of PATISSIER SHIMA, and are running collaborative campaigns with popular content such as BLUE LOCK and Theatrical Compilation Bocchi the Rock! Re:/Re:Re: in order to meet diverse consumer needs.

Furthermore, in order to increase awareness of our stores, we installed lead signs in 21 stores during the

first quarter of this consolidated fiscal year, and have confirmed the effect of increasing revenue.

## 3) Capital investment

Regarding capital investment, we invested in the renovation of 16 existing stores during the first quarter of the current cumulative consolidated period. In the renovated stores, we have introduced high-speed lanes for ordering, automated guidance systems, self-checkout registers, "smartphone ordering" that allows customers to use their own smartphones instead of touch panels, and lockers for takeout only, thereby strengthening our services to improve customer convenience and reduce labor at the stores.

#### ② Growth investment

We are working to grow our business by reviewing our store portfolio to match customer demand and by making capital investments that will lead to improved customer satisfaction and productivity.

#### 1) New store openings

Our company has opened stores mainly on roadside locations, but in order to respond to changes in the nation's demographics, we are working to optimize store locations by opening stores in front of train stations in the three major metropolitan areas and closing or relocating unprofitable stores. During the first quarter of the current cumulative consolidated period, we completed contracts to open six stores. In addition, we closed six stores due to the expiration of their lease agreements, resulting in a total of 287 stores at the end of the first quarter of the current consolidated fiscal year.

#### 2) DX · AI utilization

During the first quarter of the current cumulative consolidated period, we introduced new automated guidance systems to six stores (total of 272 stores) and self-checkouts to one store (total of 230 stores) in an effort to improve customer convenience and store productivity.

#### ③ Sustainability

Based on our company motto, "Our customers' joy is our joy," our basic policy as a bearer in the food infrastructure is to contribute to the sustainable development of society and to increase our corporate value.

#### 1) Contribution to Global environment, Local communities and Society

We have created a new "Sustainable Menu" category and are working to reduce food waste by selling products that use cuts from beef ribs when they are produced, next-generation food products that use soy meat, and products that make full use of Sushi ingredients that are cut in-store every day.

We have also invested in equipment to increase the efficiency of our air conditioning equipment, which has reduced power consumption and we will continue to work to reduce CO2 emissions.

#### 2) Human capital investment

We have implemented a 6% wage increase and are working to improve employee motivation and secure excellent human resources.

In addition, we are enhancing hierarchical training and career advancement training, which had been stalled due to the coronavirus pandemic, and promoting the development of the next generation of human resources, from part-time workers to directors.

As a result of the above, revenue for the conveyor belt Sushi business amounted to 14,622 million yen (up 3.6% from the same quarter last year).

#### <Delicatessen business>

In the Delicatessen business, we passed on the increased costs of raw materials and labor costs to our customers, but revenue was sluggish due to consumers refraining from purchasing goods as a result of rising prices. In the dessert business, revenue increased 30% year on year by acquiring new customers. We will further utilize multiple sales channels to capture demand. In terms of production at our factories, productivity has exceeded that of the same quarter last year due to the introduction of labor-saving equipment and improvements in takt time. In terms of product development, we will continue to work with each business partner to respond to diversifying consumer needs and thereby increase revenue.

As a result of the above, revenue for the Delicatessen business were 3,203 million yen (down 7.1% compared to the same quarter last year).

### (2) Explanation of Financial Position

(Assets)

Total assets for the first quarter of the current cumulative consolidated period were 30,283 million yen, an increase of 91 million yen compared to the end of the previous consolidated fiscal year. This was mainly due to a decrease of 119 million yen in cash and deposits, a decrease of 326 million yen in accounts receivable, an increase of 36 million yen in buildings and structures, an increase of 235 million yen in machinery, equipment and vehicles, an increase of 183 million yen in tools, furniture and fixtures, and an increase of 48 million yen in deferred tax assets.

## (Liabilities)

Total liabilities for the first quarter of the current cumulative consolidated period were 20,259 million yen, an increase of 175 million yen compared to the end of the previous consolidated fiscal year. This was mainly due to a decrease of 231 million yen in accounts payable, an increase of 371 million yen in accounts payable-other and long-term accounts payable-other, and an increase of 10 million yen in lease obligations (due within one year) and lease obligations.

#### (Net assets)

Net assets for the first quarter of the current cumulative consolidated period were 10,024 million yen, down 83 million yen from the end of the previous consolidated fiscal year. This was mainly due to a decrease in retained earnings due to dividend payments of 246 million yen and quarterly profit attributable to owners of parent of 152 million yen.

(3) Explanation of Consolidated Earnings Forecast and Other Future Forecast Information There are no changes to the consolidated earnings forecast for the full fiscal year announced in the "Consolidated Financial Results for the Fiscal Year Ended March 2024" on May 9, 2024.

(3) Notes on Quarterly Consolidated Financial Statement

(Method of Preparing Quarterly Consolidated Financial Statement)

The quarterly consolidated financial statements have been prepared in accordance with Article 4, Paragraph 1 of the Tokyo Stock Exchange Inc.'s Standards for Preparation of Quarterly Financial Statements, etc. and accounting standards for quarterly financial statements generally accepted in Japan (however, the omissions set forth in Article 4, Paragraph 2 of the Standards for Preparation of Quarterly Financial Statements, etc. have been applied).

(Notes on Quarterly Consolidated Balance Sheet)

(Contingent liabilities)

(Litigation, etc.)

On October 21, 2022, the Company was indicted together with the former director and employee under the double penalty provisions of the Unfair Competition Prevention Act for alleged violations of the Unfair Competition Prevention Act by the former director and employee regarding the trade secrets of competitors. The former director was found guilty on May 31, 2023, and the sentences have been finalized. The company and the employee were found guilty by the Tokyo District Court on February 26, 2024 (the Company was fined 30 million yen, and the employee were fined 2 million yen), but the company and the employee are dissatisfied and have appealed to the Tokyo High Court. Future developments may affect the company's future consolidated performance, but at this point it is impossible to predict the outcome of the final judgment, and it is difficult to reasonably estimate the amount of the impact, so it is not reflected in the quarterly consolidated financial statements. In addition, a lawsuit was filed by Hama Sushi Co., Ltd. on December 27, 2023 in the Tokyo District Court against the company, seeking payment of 511 million yen in damages. Future developments may affect our consolidated earnings; however, as it is difficult to reasonably estimate the amount of such impact at this time, it has not been reflected in our quarterly consolidated financial statements.

(Notes on Segment Information, etc.)

I. Previous first quarter cumulative consolidated period (from April 1, 2023 to June 30, 2023)

1. Information regarding the amount of revenue and profit(loss) for each reportable segment
